

Frequency of Use of EvaluATE Resources

April 2016

On the EvaluATE external evaluation survey, responders were asked, *About how often have you obtained information from the **website**, **webinars (both live and recorded)**, and **newsletter**, in the last 12 months?* The overall responses for each EvaluATE resource are presented below. For a more complete description of the results, visit <http://www.eval-ate.org/about/evaluation/>.

Frequency of use of EvaluATE's *webinars* and *website* is similar for individuals with different roles in the programs. In contrast, the *newsletter* showed lower use by grant writers compared to all other roles.

* The chart displays the combined frequency of use for recorded and live webinars (n=209), with the "n" representing the number of unique users.
